

Front end development: The DOM

JavaScript – simley

The following exercise contains the following subjects:

- ◆ the dom

Instructions

Create a webpage with one field and one button.

The user can choose the number of smileys, and you have to make them appear on the screen.

If the user enters an input that is not a number show him an error message.

How many smileys do you want to see?

 

Submit the file to Hive.
