

Backend: Express

Node JS – React and Express deployment

The following exercise contains the following subjects:

- ◆ express
- ◆ react
- ◆ heroku

Instructions

Take your express/react weather app we created in the previous exercise and deploy it to Heroku.

Note

Be prepared for a lot of errors and googling :)

Extra

Secure your API keys from preventing them to be uploaded to github.

Secure your API's keys in Heroku's environmental variables
