

Front end development: Basics

JavaScript – Dark or light color

The following exercise contains the following subjects:

◆ Switch

Instructions

Create a function that receives one argument, a string color.

Create a switch statement that:

1. If the color is yellow, pink or orange return from the function “light color”.
2. If the color is blue, purple, brown return from the function “dark color”.
3. If the color is none of the above return “Unknown color”.

Note:

It shouldn't be case sensitive

Submit the file to Hive.
