Front end development: Basics

JavaScript – Languages

The following exercise contains the following subjects:

- ◆ Switch

Instructions

1. Create a function that takes one parameter, a language.

2. Use a switch statement to log the following string for the given 'language':

mandarin: 'MOST number of native speakers!'

spanish: '2nd place in number of native speakers'

english: '3rd place'

hindi: 'Number 4'

arabic: '5th most spoken language'

for all other simply log 'Not in the top 5'
