Front end development

JavaScript – loops in loops

The following exercise contains the following subjects:

- ◆ loops

Instructions

Have this array of array's of neighbouring countries:

```
const listOfNeighbours = [
 ["Canada", "Mexico"],
 ["Spain"],
 ["Norway", "Sweden", "Russia"],
];
```

With the use of two for loops, console log all the countries one by one and in your terminal. You should see something like this in your terminal:

Neighbour: Canada

Neighbour: Mexico

Neighbour: Spain

Neighbour: Norway

Neighbour: Sweden

Neighbour: Russia
