Front end development: Basics

JavaScript – date

The following exercise contains the following subjects:
- date methods

Instructions

We briefly saw the date function (video 12 at 5:25).

Use the power of google to solve the exercise below.

Find how to get the following:

1. Name of the current day e.g. Sunday
2. Current day of the month e.g. 31
3. Current month e.g January
5. Current Year e.g 2021

Create a function that will return a string in the following format:

`Today is Sunday the 31 of January, 2021'

Tip:

Google "date function methods js" to find the relevant information.
