Front end development: Nodes

JavaScript – dom walk

The following exercise contains the following subjects:

◆ DOM

Instructions

Please make the following changes to the html file while navigating the DOM.

Create a variable that holds the <li> element with the class "start-here".

Use traverse methods to complete these tasks:

1. Change the text from "title 2" to "main title"

2. Add another sub title with the text "sub title 4"

3. Delete the last <li> element from the list.

4. Change the <title> element text to "Master Of The Dom".

5. Change the text of the <p> element ot something else of your

Note:

On the next page you have the HTML code

```html
<!DOCTYPE html>
<html lang="en">
  <head>
    <meta charset="UTF-8" />
    <meta name="viewport" content="width=device-width, initial-scale=1.0" />
    <title>Document</title>
    <script src="./script.js" defer></script>
  </head>
  <body>
    <ul>
      <li>title 1</li>
      <li class="start-here">title 2</li>
      <li>
        <ul>
          <li>sub title 1</li>
          <li>sub title 2</li>
          <li>sub title 3</li>
        </ul>
      </li>
      <li>title 3</li>
    </ul>
    <div>
        <p>Hello World!</p>
    </div>
  </body>
</html>
```

Submit the file to Hive.
